Education

Bachelor's in Commerce (Computer Application)
Rashtrasant Tukdoji Maharaj Nagpur University (RTMNU)
8.0
April 2021 to May 2024
Dr. Ambedkar Institute of Management Studies And Research, Nagpur
Degree Certificate

Skills

SQL Concepts

Joins, Subqueries, Aggregations, Window Functions

Languages

Python, SQL

Data Analysis

Data Cleaning, Data Wrangling, Exploratory Data Analysis (EDA), Statistical Analysis, KPI Analysis

Visualization & BI

Power BI, Excel, Plotly, Matplotlib

Libraries

Pandas, NumPy

Interests

Exploring with AI

Reading books

Certification

Microsoft Data Analyst certification
Certificate

Capgemini Associate Business Analyst certification
Certificate

Professional Summary

Entry-level Data Analyst with hands-on experience in Python, SQL, Excel, and Power BI across **3** large-scale analytical projects. Analyzed **100K+ e-commerce orders, 10K+ logistics shipments,** and **5K+ entertainment records**, building KPI dashboards and reports that supported delivery performance, operational tracking, and business decisions. Seeking an entry-level data analyst role focused on reporting and business analysis.

Training Experience

AlmaBetter — **October 2024 to Present**
Data Analyst Trainee
Training Certificate

- Completed **800+** hours of structured training in Full Stack Data Science & AI, working on **50+ hands-on projects** covering data analysis, visualization, and applied analytics.
- Performed **data wrangling and visualization** on **100K+** record datasets using **Python, SQL, Excel, and Power BI**, improving analytical accuracy by 25% through systematic preprocessing and validation.
- Created **stakeholder-ready dashboards** and reports using business intelligence techniques, enabling performance tracking and insight-driven discussions.

Projects

OLIST Delivery Performance Analysis | Python, Power BI — **December 2025**
Github

- Examined **100K+ e-commerce orders** to study order fulfillment cycles, delivery timelines, and purchase behavior across multiple customer segments.
- Quantified **delivery delay impact**, identifying **13.5% high-risk orders** that contributed disproportionately to negative customer reviews.
- Created **4 delivery-related metrics** (delivery duration, delay flag, on-time status, review linkage) to standardize performance measurement.

CinemaScope Analytics | SQL, Excel — **December 2025**
AlmaBetter varified project 2

- Designed an end-to-end SQL workflow on a **5K+ movie dataset**, integrating financial, rating, genre, and release-year attributes.
- Computed **profitability indicators** (gross-to-budget ratio, net returns) across **30+ years** of releases to compare commercial performance trends.
- Segmented movies into rating bands and decade buckets, revealing measurable shifts in audience preference and revenue growth over time.

FedEx Logistics Performance Analysis | Python, Power BI — **June 2025**
AlmaBetter verified project 1

- Reviewed **10K+** shipment records to compare **planned vs actual** delivery timelines across 4 shipping modes and multiple regions.
- Identified **SLA breaches** by calculating **delivery variance metrics**, highlighting vendors with consistently higher delay frequency.
- Cleaned logistics data by resolving **1.5K+ missing records** and standardizing timestamp formats to ensure reliable time-based analysis.
